

To Whom It May Concern:

I urge you to reject the NAB's petition 04-160. I am a XM radio subscriber and I greatly benefit from the diverse programming they offer, especially the XM Instant Traffic and Weather stations they have recently added. Because of my extensive driving, XM's Instant Traffic and Weather stations help me know what is going on in areas that I will be driving through. Not only are XM's Instant Traffic and Weather stations convenient, they also help ensure my safety. If there is an accident or bad weather ahead, I will be notified by the traffic and weather station for that area on my XM radio.

XM radio has been extremely beneficial for me aside from just the Instant Traffic and Weather stations. I have a very broad range of musical interest. XM radio has the most comprehensive range of music I have ever experienced. I believe that limiting XM radio is one of the worst things you can do. Please reject the NAB's petition 04-160 and keep music and information alive.
